

- 1) What are the three main dialog objects? (Circle All That Apply)
  - a. alert()
  - b. prompt()
  - c. confirm()
  - d. deceased()
- 2) The alert() dialog object can be used for warnings:
  - a. True
  - b. False
- 3) The confirm() dialog object is a Boolean based object?
  - a. True
  - b. False
- 4) Operands can be either...
  - a. Operators, Metrics and Numerics
  - b. Dimensions, Metrics and Booleans
  - c. Strings, Numbers and Booleans
- 5) Associativity refers to what?
  - a. Order of operand execution
  - b. Chaos of operand execution
  - c. Entropy of operand execution
- 6) The Special Operator Autoincrement is defined as...
  - a. \*\*
  - b. --
  - c. //
  - d. ++
- 7) The Special Operator Autodecrement is defined as...
  - a. \*\*
  - b. --
  - c. //
  - d. ++
- 8) If statements are executed when?
  - a. When the initial expression is true
  - b. When the last expression is true
- 9) While statements are executed when?
  - a. As long as the expression is all expressions are false
  - b. As long as the expression before the while evaluates to true
  - c. As long as the expression after the while evaluates to true
- 10) The do/while statement executes repeatedly until when?
  - a. Until a condition becomes false
  - b. Until a condition becomes true

- 11) In web technology, cookies were originally use for what purpose?
  - a. Debugging and Testing
  - b. Cooking and Baking
  - c. Spying on users
  
- 12) In web technology, cookies are stored by JavaScript as...
  - a. A Showroom Object
  - b. A Document Object
  - c. A Household Object
  
- 13) The prompt() dialog object takes how many arguments?
  - a. 1
  - b. 2
  - c. 3
  
- 14) For our purposes, what two operator types are there?
  - a. Arithmetic & Assignment
  - b. Semicolon & Curly Brace
  - c. While & For
  - d. If & Else
  
- 15) Comparison operators contrast two different values and return a Boolean value.
  - a. True
  - b. False
