decidel@gmail.com

Objective:

I have obtained 1 & ½ years of college education in computer programming, game development, and music composition/production. My primary intention and present goal is to obtain employment in a stable yet challenging position, so that I may support myself and improve upon my repertoire of skills while continuing to aid in the ministry of the church through my talents and abilities. I have previously been very involved with missions work in the European country of Poland, my last stay there having been over two months of summer 2011. During much of my spare time, I have been teaching myself the many necessities of hosting a web server to support different online services. I am also continually learning Java and C++, the Polish language, and improving my skills of musicianship on my own time.

Education:

2005-2008 Olathe Northwest High School Olathe, Kansas

Graduation: Spring 2008

e-Communication – Studying animation; mostly 3D, but 2D animation and drawing as well. This class met two hours every day, five days a week.

I have taken C++, Visual Basic, and Advance Visual Basic Programming to better myself in my desired career of programming and software development.

2008-2010 Johnson County Community College Overland Park, Kansas

Continuing Education

I have studied programming fundamentals, C++, and computer game creation/design to further my skills toward being a desirable candidate as computer programmer and game developer. I have also studied electronic music production and composition as a potential minor.
